

Table of Contents

SESSION A1: COMPOSITE FOAMS 1

| | |
|--|------------|
| Long Term Hygrothermal Testing of Rubber Filled Hybrid Syntactic Foams in Salt Water Media. | 79 |
| R. MAHARSIA, N. GUPTA and H. D. JERRO | |
| Enhancement of Ultrasonic Non-Destructive Evaluation Technique for High Attenuation Composite Materials | 100 |
| H.-C. WU, N. GUPTA and P. S. MYLAVARAPU | |
| Solid Particle Erosion Studies in Syntactic Foams | 98 |
| KISHORE, N. GUPTA and A. KIRAN | |
| Effect of Density and Volume Fraction of Microballons on Ultrasonic Attenuation Behavior of Syntactic Foams | 96 |
| P. S. MYLAVARAPU and E. WOLDESENBET | |
| Studies on the Synthesis and Characterization of Polyurethane/Nanoclay Nanocomposite Foams | 104 |
| M. V. HOSUR, A. A. MOHAMMED and S. JEELANI | |

SESSION A2: COMPOSITE FOAMS 2

| | |
|--|------------|
| Fracture Toughness Characterization of Syntactic Foams | 1 |
| M. A. WAHAB, V. B. GORUGANTU and N. GUPTA | |
| A Micromechanical Model for Predicting Fracture Toughness of Functionally Graded Foams as Load-Carrying Thermal Protection System | 69 |
| S.-J. LEE and B. V. SANKAR | |
| 3D Fiber-Reinforced Syntactic Foams Based on Amino Microspheres .. | 203 |
| Y.-J. HUANG, L. VAIKHANSKI and S. R. NUTT | |
| Some Remarks on the Micromechanical Modeling of Glass/Epoxy Syntactic Foams | 101 |
| L. BARDELLA and F. GENNA | |
| Tensile Strength of Glass Microballoon-Epoxy Resin Syntactic Foams | 102 |
| N. GUPTA and R. NAGORNY | |

SESSION B1: PROCESSING 1

Finite Element Model for Axisymmetric Consolidation of Thermoplastic Composite Materials 15

M. WYSOCKI, L. E. ASP, S. TOLL and R. LARSSON

Applications of Externally Bonded Composites for Concrete Repair and Rehabilitation 74

J. F. DAVALOS, C. LIN, I. RAY and D. BRAYACK

Consolidation and Microstructure Variation in Compression Molded Commingled E-Glass Fiber/PET Laminates 138

A. RAMANATHAN and P. K. MALLICK

Manufacturing of Braided Thermoplastic Composites with Carbon/Nylon Commingled Fibers 109

L. LABERGE-LEBEL and S. V. HOA

Forming Properties of a Thermoplastic Lightweight Fiber-Metal Laminate 7

G. REYES-VILLANUEVA and S. GUPTA

SESSION B2: PROCESSING 2

Friction Determination for Filament Winding Applications Part 1: Mandrel Shape and Machine Control 110

S. KOUSSIOS, O. K. BERGSMA and A. BEUKERS

Friction Determination for Filament Winding Applications Part 2: Experimental Evaluation 111

S. KOUSSIOS, O. K. BERGSMA and A. BEUKERS

Adhesion and Characterization of High Density Polyethylene/Elvaloy® Blends for Hot Melt Coating of Steel 63

C. T. LOVE, G. XIAN and V. M. KARBHARI

Novel Fiber-Sizings for Simultaneous Impact/Structural Performance from Glass Reinforced Composites 182

R. E. JENSEN and S. H. MCKNIGHT

Role of Fiber-Matrix Interface on the Thermo-Oxidative Degradation 34

K. V. POCHIRAJU, G. SCHOEPPNER and G. P. TANDON

SESSION C1: WANG SYMPOSIUM 1

Effect of Random Fiber Distribution on Certain Failure Initiation in Composites 149

K. C. YAN

A Consistent Treatment of Bending of Anisotropic Laminated Plates... 137
J. M. WHITNEY

Delamination Fracture Analysis Using Novel Joint Deformation Models112
P. QIAO and J. WANG

Mechanics of the Fiber-Matrix Interphase Push-Out Test 128
X. HUANG, M. E. FOLEY, T. A. BOGETTI and J. W. GILLESPIE, JR.

Axial and Burst Analysis of Offshore Composite Risers..... 23
W. KIM, O. O. OCHOA and C. MILLER

Fiber-Reinforced Composite Laminate Terminology: ‘Understood’ but Misused—Suggestions for Improvement..... 31
R. M. JONES

SESSION C2: WANG SYMPOSIUM 2

Effect of Contiguity on the Mechanical Behavior of Co-Continuous Ceramic Metal Composites..... 199
J. S. PARK, C. T. SUN and K. P. TRUMBLE

Some Comments on the Micromechanical Analysis of Heterogeneous Materials with Macroscopically Homogeneous and Periodic Microstructures 170
A. DRAGO and M.-J. PINDERA

Effect of Random Fiber Distribution on Certain Failure Initiation in Composites..... 150
K. C. YAN

SESSION D1: IMPACT 1

Characterization of Energy Absorption Capability of Composite Materials Subjected to Impact Loading..... 107
D. LIU and T. UCHIYAMA

Modeling Ballistic Impact of a Lead Projectile Onto a Flexible Fabric Laminate 13
Y. DUAN, M. KEEFE, T. A. BOGETTI and B. POWERS

Certification of the CFRP Rear Energy Absorber for the Star Mazda Series Racecar 216
C. NORRIS, D. McLARTY and P. FERABOLI

The Study of Obliquity on the Ballistic Performance of Aramid Fabric... 8
C. K. CHU, Y. L. CHEN, G. C. HSEU, D. G. HWANG
and K. C. LEE

SESSION D2: IMPACT 2

| | |
|--|------------|
| Dynamic Axial Crush Tests of Roll Wrapped Composite Tubes: Tube Geometry and Material Effects..... | 2 |
| A. L. BROWNE and N. L. JOHNSON | |
| Crushing Performance of Braided Fabric FRP Under a New Collapse Trigger..... | 65 |
| Y. YANG, A. NAKAI and H. HAMADA | |
| Characterizing Nonlinear Rate Dependent Behaviors of Fiber Composites Using Micromechanical Approach..... | 29 |
| K.-H. CHEN, J.-C. KUO and J.-L. TSAI | |
| Buckling and Debond Growth of Partial Debonds in Composite Splice Joints..... | 142 |
| H. KWON and H. J. KIM | |

SESSION E1: NANOCOMPOSITE 1

| | |
|--|------------|
| Nanotechnology of Carbon Nanotubes and Safety Issues..... | 57 |
| V. M. HARIK | |
| Multifunctional, Light-Weight and Ultra Strong Nano-Structured Clay/ Polymer Composite Thin Films Prepared by Layer-by-Layer Assembly: From Ultra-Low Thermal Conductivity to Antibacterial Coatings..... | 147 |
| P. PODSIADLO and N. A. KOTOV | |
| Interaction between a Nanofiber and a Crack..... | 163 |
| A. GAWANDI, J. M. WHITNEY, G. P. TANDON and R. A. BROCKMAN | |
| Adhesion and Mechanical Property Characterization of Reactive Graphitic Nanofibers Reinforced Epoxy as Composite Matrix..... | 45 |
| A. ZHAMU, W. H. ZHONG, Y. P. HOU and J. J. STONE | |
| Nanocomposites with Tailored Nanostructures Using Random and Magnetically Aligned SWNT Buckypapers/Resin Infiltration Approach..... | 83 |
| B. WANG, R. LIANG, C. ZHANG and L. KRAMER | |
| On Aligning Multi-Walled Carbon Nanotubes to Enhance Interlaminar Strength of Fiber Reinforced Composites..... | 159 |
| Z. FAN, J. ALMS and S. G. ADVANI | |

SESSION E2: NANOCOMPOSITES 2

| | |
|--|------------|
| Multi-Scale Modeling of a Graphite-Epoxy-Nanotube System..... | 130 |
| S. J. V. FRANKLAND, J. C. RIDDICK and T. S. GATES | |

Modeling and Analysis of Interfacial Bonding and Load Transfer in SWNT-Reinforced Composites 81
O. MARIETTA-TONDIN, R. LIANG, C. LIU, C. ZHANG
and B. WANG

Modeling Functionally Graded Interphase Regions in Carbon Nanotube Reinforced Composites 125
G. D. SEIDEL, D. C. LAGOUDAS, S. J. V. FRANKLAND
and T. S. GATES

Systematic Upscaling for Multiscale Modeling of Multifunctional Polymer Nanocomposites 50
B. DISKIN, V. M. HARIK, Z. OUNAIES and A. BRANDT

A Methodology for Strength and Reliability Analysis of Carbon Nanofiber and Conventional Composite Plates 168
S. PILLA, A. HAMMITT and E. NIKOLAIDIS

Characterization and Modeling of Strength Enhancement Mechanisms in Composite Materials at the Nanoscale 117
S. ROY, K. NARASIMHAN and F. HUSSAIN

SESSION F1: SANDWICH

Responses of Sandwich Panels with Large Notches Under In-Plane Loads 36
K. S. RAJU, J. S. TOMBLIN and K. W. PETZOLD

Mechanical Characterization of GFRP Skin/Paper Core Sandwich Panels 14
D. DAVID, K. WARNEMUENDE and H.-C. WU

Evaluation of Facesheet-Core Delamination by a Cohesive Zone Model 72
W. WANG and J. F. DAVALOS

Development of Design Guidelines for Honeycomb FRP Sandwich Bridge Deck Panels 75
A. CHEN and J. F. DAVALOS

SESSION F2: NANOCOMPOSITES 3

Anisotropic Behavior of Rigid Polyurethane Foam with Acicular Nanoparticles Infusion under High Strain Rate Compression 37
M. F. UDDIN, H. MAHFUZ, S. ZAINUDDIN and S. JEELANI

Thermomechanical Characterization of Nanoreinforced Composites . . . 169
A. SHARMA, J. E. SCHOBER and C. E. BAKIS

Aggregation Behavior in Carbon Nanotube/Modified Soy Oil Composites.....161
I. M. McANINCH and R. P. WOOL

Acrylate Rubber/Organoclay Hybrid Nanocomposites from Renewable Resources 148
L. ZHU and R. P. WOOL

On the “Shear Acoustic Wind” Acting on Particles Embedded in Liquid Crystal 193
S. L. LOPATNIKOV and J. W. GILLESPIE, JR.

Nanomechanics on the Deformation of Single- and Multi-Walled Carbon Nanotubes under External Radial Pressure..... 122
J.-R. XIAO, S. L. LOPATNIKOV, B. A. GAMA and J. W. GILLESPIE, JR.

SESSION A3: COMPOSITE FOAMS 3

Pressure Infiltration Synthesis of Lightweight Syntactic Aluminum Matrix Composites 95
P. K. ROHATGI, S. ALARAJ and N. GUPTA

Multifunctional Hybrid Carbon Foams: Processing, Characterization and Modeling 46
M. D. SARZYNSKI, O. O. OCHOA, K. LAFDI and D. M. NAVE

Porous Structures via Selective Laser Sintering: A Route to Functional Preform Production..... 66
M. ERDAL and O. ILKGUN

New Processing Techniques of Ceramic Foams..... 99
Y.-W. KIM, D.-H. JANG, C. B. PARK and H.-D. KIM

SESSION A4: ADVANCED TECHNOLOGY PROGRAMS

Nano-Clay, a Revolutionary New Fire Retardant or a Potential Fire Hazard? 91
J. P. RYND, R. LOH, Y. DELAVIZ, M. POLASKY, B. FABIAN and H. F. WU

Microwave Nondestructive Evaluation for Fiber Reinforced Polymer Wrapped Concrete Structures 90
M. Q. FENG, Y. J. KIM and K. PARK

Improvements in Tooling and Injection for High Volume Fraction LCM 88
D. STEWART and H. F. WU

| | |
|---|-----------|
| Multi-Axis Control for Composites Processing | 87 |
| D. W. JOHNSON and S. GARRETT | |

SESSION B3: WANG SYMPOSIUM 3

| | |
|---|------------|
| Heterogeneous Finite Element Methods for Micro-Stress Analysis of Composites | 190 |
| C. TAO and Y. WANG | |

| | |
|---|-----------|
| A Meshless Local Petrov-Galerkin (MLPG) Micromechanical Model for Fiber Composites | 21 |
| T. DANG and B. V. SANKAR | |

| | |
|---|----------|
| Particle Size Effects in a Particle-Reinforced Composite as Determined Using a Random Unit Cell Approach and Experiments | 3 |
| C. T. SUN, P. SAFFARI, R. RANADE, G. J. ROBINSON, Q. WAN, K. SADEGHIPOUR and G. BARAN | |

| | |
|--|------------|
| Numerical Simulation on Tensile Failure Process of Unidirectional Carbon Prepregs with Different Matrix | 188 |
| Y. ZHOU, M. A. BASEER, H. MAHFUZ and S. JEELANI | |

| | |
|---|------------|
| Torsion of Noncircular Composite Cylinders | 192 |
| W. T. HAYNIE and M. W. HYER | |

SESSION B4: FAILURE BEHAVIOR 1

| | |
|--|-----------|
| Strength and Failure Mechanism of Graphite/Epoxy $[0_2/\pm\theta]_s$ Laminates with a Hole | 11 |
| W. S. CHAN, S. HARN and M. ROY | |

| | |
|---|------------|
| Properties of Glass-Fiber Reinforced Thermoplastics with GF Joined Structure | 177 |
| M. NOMURA, A. NAKAI and H. HAMADA | |

| | |
|--|-----------|
| Consideration of Time-Dependent Degradation in the Development of Probabilistic Based Design of FRP Strengthening | 32 |
| R. A. ATADERO and V. M. KARBHARI | |

| | |
|---|-----------|
| Specific Energy Absorption of Grid-Stiffened E-Glass/Polypropylene Composite Panels under Transverse Loading | 58 |
| P. JADHAV and P. R. MANTENA | |

| | |
|---|------------|
| Strain Rate Effect on the Fracture Toughness of Carbon/Epoxy Composite in a Deep-Sea Environment | 195 |
| S. R. HA, K. Y. RHEE, H. J. KIM and D. H. JUNG | |

SESSION C3: WANG SYMPOSIUM 4

- Designer Linear Viscoelastic Material Properties Tailored to Minimize Probabilistic Failures for Dynamic Composite Creep Buckling. 146**
H. H. HILTON
- A Flexible Composite Coupling with Damping 186**
H. GHONEIM and D. J. LAWRIE
- Atomistic Element Analysis of Electrostrictive Graft Elastomer 172**
Y. WANG, C. T. SUN, C. ZHANG and J. SU

SESSION C4: IMPACT 2

- Numerical Simulation of the Improvement Characteristics of the Compression after Impact Strength of CFRP Laminates by Through the Thickness Stitching 119**
A. YOSHIMURA, K. BAE and N. TAKEDA
- Impact Response and Failure Prediction of Marine Composite Structures. 133**
J. LUA, B. GREGORY, J. GORFAIN, J. SANKAR and D. PAI
- A Generalized Solution Methodology for Projectile Impact of Composite Plates and Sandwich Panels. 70**
C. LIN and M. S. HOO FATT
- A Quasi-Static Penetration Model of Ballistic Penetration of Thick-Section Composites. 52**
B. A. GAMA and J. W. GILLESPIE, JR.

SESSION D3: PROCESSING 3

- Mechanical Behavior of Random Fiber Composite Perforated Plates . . . 84**
M. EGGEN, J. HAMBLETION, S. C. MANTELL and J. H. DAVIDSON
- On the Role of Membrane to Improve Quality of VARTM-Processed Composites. 126**
S. C. AMOUROUX, D. HEIDER, S. LOPATNIKOV
and J. W. GILLESPIE, JR.
- Modeling of the Solvent-Free Thermal Spray Deposition of Polymer and Polymer-Ceramic Composite Coatings. 41**
M. IVOSEVIC, R. A. CAIRNCROSS and R. KNIGHT
- Consideration of Time-Dependent Degradation in the Development of Probabilistic Based Design of FRP Strengthening. 217**
R. A. ATADERO and V. M. KARBHARI

SESSION D4: EMERGING MATERIALS 1

The Nanohybrids of Metallic and Semiconducting Nanomaterials Upon Biological and Polymeric Conjugation: Plasmon—Exciton Interaction, Fluorescence Enhancement, and their Sensing Application 166

J. LEE, A. O. GOVOROV and N. A. KOTOV

Structural Biocomposite Laminates from Poly (lactic acid) 155

M. MISRA, M. S. HUDA, L. T. DRZAL and A. K. MOHANTY

Novel Green Composites from Recycled Newspaper Fibers and Poly(hydroxyalkanoates). 151

R. BHARDWAJ, A. K. MOHANTY, L. T. DRZAL and M. MISRA

Bioresorbable Polymers and Infiltrated Carbon Foams for Biomedical Applications 158

D. RODRIGUEZ, O. OCHOA, K. LAFDI, W. FOX, I.-C. LEE and T.-H. YOUNG

Thermosetting Foam with a High Bio-Based Content from Acrylated Epoxidized Soybean Oil and Carbon Dioxide 160

L. M. BONNAILLIE and R. P. WOOL

SESSION E3: NANOCOMPOSITES 4

Improving the Fracture Toughness of Vinyl Ester Composites Using Electrospun Interlaminar Layers. 42

J. ROBINETTE and G. R. PALMESE

Laboratory Test for Manufacturing PLA Nano Fiber from Electrospinning Method 76

Y. YAMASHIA, A. TANAKA and F. KO

Electrospinning of Submicron Polyacrylonitrile Fibers Containing Vapor Grown Carbon Nanofibers. 215

H. LAM, F. KO, H. YE and Y. GOGOTSI

High Strength Nanomaterials Fiber for Lightweight Composite Missile Cases 92

R. FOEDINGER, S. CHUNG, S. CHATTERJEE, F. KO, N. TITCHENAL and J. K. ROBERTS

Aligned Electrospun Nanofibers for Nanocomposite Applications 77

S. NARTKER, L. T. DRZAL and M. MISRA

SiC Nanowires from Electrospun Nanofibers 201

N. TITCHENAL, H. YE, Y. GOGOTSI and F. KO

SESSION E4: NANOCOMPOSITES 5

Nano Composites Mechanistic Property Prediction 135

C. C. CHAMIS and L. M. HANDLER

Buckling of Carbon Nanotube-Reinforced Polymer Laminated Composite Materials Subjected to Combined Axial Compression and Shear Loadings. 179
J. C. RIDDICK, T. S. GATES and S. J. V. FRANKLAND

Oriented Single-Wall Carbon Nanotube Polymer Composites by Air-Water Interfacial Force Combining During Layer-by-Layer Assembly . 156
B. S. SHIM, E. JAN and N. A. KOTOV

Organoclay Effect on Mechanical Behaviors of Fiber Reinforced Polymeric Nanocomposites 30
J.-L. TSAI, J.-C. KUO and S.-M. HSU

Thermally Sprayed Nanocomposite Coatings for Corrosion and Wear Resistance. 48
V. GUPTA, M. IVOSEVIC, R. A. CAIRNCROSS, T. E. TWARDOWSKI and R. KNIGHT

Nano-Microstructured Coatings by Electrospray Deposition: Effect of Surface Morphology on Wettability 22
H. MATSUMOTO, T. MIZUKOSHI, M. MINAGAWA, A. TANIOKA and Y. YAMAGATA

SESSION F3: FAILURE BEHAVIOR 2

Test Methods for Determining Temperature Dependent Material Properties and Residual Stress Modeling for Laminated Composites 191
L. SPERIATU, W. SCHULZ and P. IFJU

Wireless Detection of Internal Delamination Cracks for Carbon/Epoxy Composite Using Electrical Resistance Method 164
R. MATSUZAKI and A. TODOROKI

Assessment of FRP Rehabilitation at a Systems Level Through Progressive Damage and NDE 47
K. K. GHOSH and V. M. KARBHARI

Damage Monitoring of CFRP Laminates with Open Holes using Chirped FBG Sensors 118
S. YASHIRO, T. OKABE and N. TAKEDA

SESSION F4: NANOCOMPOSITES 6

Preliminary Investigations of a Hierarchically Structured Polymer Nanocomposite. 35
J. P. THOMAS, A. ROHATGI, J. N. BAUCOM and W. R. POGUE

Study of Ultrasonic Dispersion Method in CNT Reinforced Polymer Matrix Composites 204
A. RAMASETTY, A. HAQUE and A. M. SHAMSUZZOHA

Modeling Studies on Boron Nitride Nanotubes and their Composites180
C. LI and T.-W. CHOU

Flame Retardancy and Microstructure of Nylon6/Layered Silicate Nanocomposites86
K. SHANMUGANATHAN, S. DEODHAR, S. RAZDAN, Q. FAN,
P. D. CALVERT, S. B. WARNER and P. K. PATRA

Characterization and Modeling of Single-Wall Carbon Nanotube/Polymer Nanocomposites 144
H. LU, B. WANG, G. HUANG, A. MAMEDOV and S. GUPTA

Effect of Particle Size on Mechanical Properties of Polymer Nanocomposites152
A. ADNAN, C. T. SUN and H. MAHFUZ

SESSION A5: TEXTILE COMPOSITES 1

Corrugated Composite as a Candidate for Flexible Wing Elements 25
T. YOKOZEKI, S.-I. TAKEDA, T. OGASAWARA and T. ISHIKAWA

Compressive Failure of NCF Composites 26
F. EDGREN

Hierarchical Strategy for Analysis of Materials with Complex Microstructure194
J. VARGHESE, J. WHITCOMB, D. GOYAL and X. TANG

Behavior of Biaxial Braided Composites Subjected to Uniaxial Tensile Loading49
J. TATE, A. D. KELKAR, D. GOYAL, J. WHITCOMB and X. TANG

Degradation Behavior of Multi-Axial Warp Knitted Fabric Composite Immersed in Hot Water 139
K. SUGIMOTO, N. KAWAI, Y. NISHIKAWA, A. NAKAI, H. HAMADA
and Y. FUJII

Fabrication and Mechanical Properties of Fiber Hybrid Multi-Axial Warp Knitted Fabric Composite219
A. KASUYA, N. KAWAI, K. SUGIMOTO, A. NAKAI and H. HAMADA

SESSION A6: EMERGING MATERIALS 2

Ultrahigh-Thermal-Conductivity Thermal Management Composites for Microelectronic and Optoelectronic Packaging 127
C. ZWEBEN

Flexible Matrix Composite Actuators 116
Y. SHAN and C. E. BAKIS

The Sky Ahead. 124
R. L. SIERAKOWSKI

**Development of a Self-Assembly Method for Manufacturing
Nanocomposites with High Loadings of Nanoparticles. 153**
M. MERRILL and C. T. SUN

**Study of Ultrasonic Dispersion Method in CNT Reinforced
Polymer Matrix Composites 154**
A. RAMASETTY, A. HAQUE and A. M. SHAMSUZZOHA

SESSION B5: PROCESSING 4

**Full Field Monitoring of Thickness Variation in Vacuum Assisted
Resin Transfer Molding (VARTM). 178**
J. M. BAYLDON and I. M. DANIEL

Failure of Multilayered Viscoelastic Polymers. 210
C. WU, S. C. MANTELL and J. H. DAVIDSON

**Measurement of Transverse Permeability Using Gaseous and
Liquid Flow 18**
Y. ZHANG, S. SCHOLZ, S. C. AMOUROUX, J. W. GILLESPIE, JR.
and D. HEIDER

**Use of Flow Simulation for Design, Optimization and Control of
Liquid Composite Molding Processes 157**
J. M. LAWRENCE, P. SIMACEK, A. GOKCE and S. G. ADVANI

SESSION B6: NANOCOMPOSITES 7

**Nanoparticle-Based Mitigation of Fiber Print-Through in Composite
Mirrors. 175**
M. LUI and H. T. HAHN

**Processing and Properties of Exfoliated Graphite Nanoplatelet-
Polypropylene Nanocomposites 196**
K. KALAITZIDOU, H. FUKUSHIMA and L. T. DRZAL

Low Velocity Impact Response of NanoComposites Plates. 27
A. F. ÁVILA and H. V. DUARTE

**Fracture Toughness and Water Uptake of High Performance
Epoxy Nanocomposites 108**
W. LIU, S. V. HOA and M. PUGH

Carbon Nanotube Reinforced *Bombyx mori* Silk Nanocomposites 0
J. AYUTSEDE, M. GANDHI, Y. GOGOTSI and F. KO

**Structure and Properties of Clay/PVDF Nanocomposites Produced
by Electrospinning. 220**
T. INOUE, D. DILLON, C. Y. LI and F. K. KO

SESSION C5: MECHANICS 1

| | |
|--|-----|
| Explicit Local Buckling Analysis of Elastic Restrained Composite Orthotropic Plates | 113 |
| L. SHAN and P. QIAO | |
| Axial Buckling Behavior of Noncircular Composite Cylinders | 183 |
| M. SUN and M. W. HYER | |
| Statistical Approach to Delamination Onset Prediction | 44 |
| E. V. IARVE, S. CHELLAPILLA and D. H. MOLLENHAUER | |
| Modeling of Anticlastic Stability in Elastically Tailored Composites | 17 |
| S. TAWFIK, X. TAN, S. OZBAY and E. ARMANIOS | |
| Effect of Fiber Waviness on the Stability of Laminated Plates Under Various Loading | 24 |
| H. G. RAI, E. V. HONEIN, M. G. SAROUNI and M. I. NAJJAR | |
| Deformation of Composite Plates Subjected to Mechanical and Electromagnetic Loads | 6 |
| O. I. ZHUPANSKA and R. L. SIERAKOWSKI | |

SESSION C6: MECHANICS 2

| | |
|--|-----|
| Free Edge Stresses in the Bending of Bidirectional Laminates | 54 |
| J. M. WHITNEY | |
| Development of Design Guidelines for Honeycomb FRP Sandwich Bridge Deck Panels | 71 |
| A. CHEN and J. F. DAVALOS | |
| Critical Short-Term Data on Durability of FRP Reinforcing Bars for Long-Term Prediction Models | 73 |
| Y. L. CHEN, J. F. DAVALOS, I. RAY and H.-Y. KIM | |
| Fabrication of $TiAl_3/Al_2O_3$ by Three-Dimensional Printing | 218 |
| X. YIN, N. TRAVITZKY, R. MELCHER and P. GREIL | |
| Design of a Lightweight Ceramic Gun Barrel with a High Tension Thermoplastic Composite Overwrap | 167 |
| J. TIERNEY, J. W. GILLESPIE, JR., D. BYRON, H. McELROY and S. CYTRON, JR. | |
| Thermal and Mechanical Strain Field in Composite Scarf Joints | 59 |
| B. COOK, G. SCHOEPNER and A. PALAZOTTO | |

SESSION D5: EMERGING MATERIALS 3

Novel Green Nanocomposites from Toughened Bacterial Bioplastic and Titanate Modified Layered Silicate 185

A. K. MOHANTY and Y. S. PARULEKAR

Influence of Processing Methods and Fiber Length on Physical Properties of Kenaf Fiber Reinforced Soy Based Biocomposites 131

W. LIU, M. MISRA, L. T. DRZAL and A. K. MOHANTY

Characterization of Chicken Feather Materials for Use in Biocomposites 143

J. W. KOCK, R. J. BARBIERI, J. M. JUSTICE, K. E. KURTIS, T. R. GENTRY and H. NANKO

Influence of Feather Fiber on the Mechanical Properties of Glass Fiber, Polypropylene Composites 214

T. A. BULLIONS and A. C. LOOS

Effects of Compatibilizers and Surface Treatments on Mechanical Properties of Recycled GFRP/PP Composites 64

M. ANAN, T. OKAMOTO, Y. W. LEONG, A. NAKAI and H. HAMADA

SESSION D6: TEXTILE COMPOSITES 2

Numerical Simulation of Composite Laminates Reinforced with Zanchor Technology 132

Y. AOKI, Y. IWAHORI, Y. NAGAO and T. ISHIKAWA

A Virtual Testing Methodology for Characterizing Woven Fabric Laminated Composite Plates at Given Damage State 141

J. LUA, W. YU, R. MOHAN and J. SANKAR

Buckling of Tri-Axial Woven Fabric Composite Structures Subjected to Bi-Axial Loading: Non-Linear Finite Element Analysis and Analytical Solution 106

D. XU, S. V. HOA and R. GANESAN

Progressive Failure Modeling of Triaxial Fabric Composite Materials . . 129

C.-F. YEN, B. A. CHEESEMAN and C. P. R. HOPPEL

A Direct Micromechanical Failure Analysis of Textile Composites 67

R. L. KARKKAINEN, B. V. SANKAR and J. T. TZENG
